## PROFESSIONAL SUMMARY

---

Motivated Computer Science and Engineering student seeking an internship to apply skills in software development, machine learning, networking, and cybersecurity fundamentals. Passionate about continuous learning through projects, bootcamps, and collaborative problem-solving in real-world environments.

## INTERNSHIPS

---

|                                                                                                                                                                                                                                                                                                                                                                                                                         |                             |

## TECHNICAL SKILLS

---

### Programming Languages

Python, C++, JavaScript, HTML, CSS

### Frameworks & Tools

React, Git/GitHub, VS Code, Linux environment

### Software Development

Automation, API Integration, Web Development, AI/ML principles

### Networking

Fundamental gained during BSNL Internship

### Cyber-Security

Basic Knowledge from seminars

### Operating Systems

Linux (Arch, Ubuntu), Windows

## INTERESTS

---

- Artificial Intelligence
- Machine Learning
- Full-Stack Web Development
- Open Source Software

## PROJECTS

---

### Circuit\_Chronicles

- A structured platform for organizing and presenting electronics/engineering concepts, designed to act as a centralized knowledge base.
- Focuses on modular content organization, making complex circuit-related topics easier to navigate.
- Github Link: [https://github.com/pvk-96/Circuit\\_Chronicles](https://github.com/pvk-96/Circuit_Chronicles)

### Linux System Health

- A Linux-based system monitoring tool that tracks key performance metrics such as CPU usage, memory consumption, disk utilization, and system uptime.
- Built using shell scripting and native Linux utilities.
- Github Link: <https://github.com/pvk-96/Linux-Sys-Health>

### Shell-Python

- A hybrid command-line interface project combining shell scripting with Python to automate tasks and enhance terminal usability.
- Github Link: <https://github.com/pvk-96/shell-python>

## SOFT SKILLS

---

### Interpersonal & Professional

- Time management
- Problem-solving
- Multitasking
- Adaptable
- Team player
- Communication

## ADDITIONAL INFORMATION

---

### Additional Details

- Proficient with Linux system customization and terminal-based tools.
- Strong foundation in algorithms, data structures, and practical coding.
- Participated in AI/ML and software development bootcamps and hackathons.
- Effective communicator with a keen interest in continuous learning.
